

Artificial Intelligence (AI) Use Policy

AI tools may be used by students, instructors, and staff to support learning, creativity, lesson planning, and workplace productivity at Capri Beauty College. AI should assist—not replace—individual effort, professional judgment, or hands-on cosmetology training.

All users must:

- Follow instructor or administrator directions regarding when AI is permitted.
- Review AI-generated content for accuracy, professionalism, bias, and safety.
- Acknowledge the use of AI when submitting coursework or creating official materials.
- Protect the privacy of students, clients, and employees. Do not upload names, contact information, client records, photographs, or other confidential information without authorization and consent.
- Never rely on AI as the sole source for chemical services, product safety, sanitation, licensing regulations, medical concerns, or other health and safety decisions.
- Avoid using AI to complete assignments dishonestly, impersonate others, create misleading content or emails, or engage in harassment or discrimination.
- Use only school-approved AI tools on school devices or for school business.

Misuse of AI may result in revision of work, loss of credit, restricted technology access, or disciplinary action under existing school policies. When unsure whether AI use is appropriate, ask an instructor or administrator before using it.
